## Career Objective

Currently building strong skills in Frontend Development (HTML, CSS, JavaScript, React). My career goal is to advance into a MERN Stack Developer, and later specialize in integrating AI technologies into web applications. Seeking opportunities to learn, grow, and contribute to real-world projects while developing future-ready skills.

## Education

### B.Sc. Computer Science, University of Madras

(2024– 2027, Currently in 2nd Year)

## Technical Skills

### Frontend

HTML, CSS, JavaScript, React.js, Bootstrap

### Tools & Platforms

Git, GitHub, VS Code, Postman

### Other Skills

REST APIs, CRUD operations, Responsive Web Design

## Projects

### To-Do List App (React.js)

Developed a task management app with full CRUD functionality. Focused on clean UI design and reusable components.

### First Project (HTML/CSS/JS)

Created a simple structured website as a foundational project. Practiced responsive design and proper code structuring.

### Book-Tracker (React App)

Built a React app to track and manage books with a clean, responsive UI.

### News Reader App

Created a responsive React app to fetch and display news articles using public APIs, with a clean UI and category-based filtering.

### react-signals

Built a React demo using Signals for fine-grained reactivity and efficient state updates. Explored signal-based rendering to optimize performance and reduce unnecessary re-renders.
